

New Zealand Government

It  
takes  
Three

# One thing you can protect them from.

You can't protect them from everything, but you can help protect them from cervical cancer. The cervical cancer vaccine is available to all girls born on or after the 1 January 1990. This vaccine protects against the virus that most commonly causes cervical cancer.

**This vaccine is FREE right now for young women born in 1990 and 1991. They can ring their doctor, practice nurse or health service and ask for an appointment.**

From early 2009, this vaccine is FREE for all girls and young women aged 12 to 18. Most girls will be able to get the vaccine through their school. Where the vaccine is not offered through schools, it is available FREE from their doctor, practice nurse or health service.
